

# Non-University Research Institutes

Non-university research facilities

The city of Greifswald is an important science, technology and economic location in connection with the surrounding area.

Numerous non-university research institutions and innovative companies contribute to this image alongside the facilities of the University of Greifswald.

The strong networking of science, research and technology has a positive impact on knowledge-based business start-ups and the development of new innovative processes.

Particular strengths lie in future-oriented top research and technology, especially in the fields of plasma technology, life science, biotechnology and animal health.

The largest non-university research institutions include:

## **Friedrich Loeffler Institute**

Federal Research Institute for Animal Health

- [Research at the Friedrich Loeffler Institute](#)

## **Leibniz Institute for Plasma Research and Technology**

- [Research at Leibniz Institute for Plasma Research and Technology](#)

## **Max Planck Institute for Plasma Physics**

- [Research at Max Planck Institute for Plasma Physics](#)
